Colloids and Surfaces A: Physicochemical and Engineering Aspects, 73 (1993) 301
Elsevier Science Publishers B.V., Amsterdam

Author Index

Amirtharajah, A. 211

Borkovec, M. 65
Boxall, C. 145
Buffle, J. 255

Clark, D.A. 287
Corapcioglu, M.Y. 275

Degovics, G. 65
de Keizer, A. 133
Dodds, J. 77
Dukhin, A.S. 29
Dukhin, S.S. 201

Elimelech, M. 49

Fane, A.G. 165
Fell, C.J.D. 165
Filella, M. 255
Fogler, H.S. 237

Gardiner, M.P. 179

Harrison, I. 179
Hesketh, N. 19
Higgo, J.J.W. 19, 179

Jiang, S. 275
Jones, M.N. 19

Kelsall, G.H. 145
Koopal, L.K. 201
Korteweg, A.J. 133

Laggner, P. 65
Leslie, G.L. 165
Longworth, G. 179
Lyklema, J. 133

Marshall, K.C. 165
Mehrian, T. 133
Mitchell, C.J. 103
Mohan, K.K. 237

O'Melia, C.R. 89

Paul, C.J. 287
Puls, R.W. 287

Raveendran, P. 211
Reed, M.G. 237
Rodier, E. 77
Rogers, H.R. 229

Schneider, R.P. 165
Song, L. 49
Sticher, H. 65
Stumm, W. 1

Thompson, D.W. 103
Tiller, C.L. 89
Tipping, E. 19, 117

Vaidya, R.N. 237

Warwick, P. 179
Wilkinson, A.E. 19
Williams, G.M. 179
Wu, Q. 65

Zhang, Z. 145

Colloids and Surfaces A: Physicochemical and Engineering Aspects, 73 (1993) 302–303
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Adsorption, 89, 133
Aggregation, 255
Analytical ultracentrifugation, 19
Aquatic colloids, 1, 255
Aqueous dispersion, 103
Archibald method, 19

Backwashing, 211
Bacterial adhesion, 165
Biofouling, 165
Biospecific mechanism, 29
Biotechnology, 165

Calcium, 89
Calorimetry, 133
Cell electrophoresis, 29
Chromatographic technique, 77
Clay, 133
Clay swelling, 237
Coagulation, 89
Coagulation/sedimentation, 255
Colloid capture, 49, 77
Colloid deposition, 49
Colloid detachment, 211
Colloid stability, 287
Colloid transport, 77, 179
Colloidal semiconductors, 145
Colloidal stability, 89, 255
Colloids, 229, 275
Contaminants, 275

Dodecylpyridinium chloride, 133
Double layer, 201
Double layer formation, 29

Electrosorption, 133, 201
Equilibrium partitioning, 229
Excluded-area effect, 49

Filtration, 211
Fines migration, 237
Formation damage, 237
Fulvic acid, 19

Glacial sand aquifer, 179

Hematite, 89, 145
Humic acid, 19, 117
Humic substances, 19
Hybrid equilibrium model, 275
Hydrodynamic forces, 211
Hydrolytic precipitation, 103

Ion binding, 117
Iron, 103
Iron oxides and oxyhydroxides, 145

Kaolinite, 133
Kinetics, 229

Microfiltration, 165
Mineral particles, 103
Model, 1
Modelling, 201

Natural organic matter, 89
Natural porous media, 287
Natural waters, 255
Non-interacting patches, 201

Organic contaminants, 229

Particle deposition, 49
Particle deposition dynamics, 49
Particle size analysis, 211
Particle transport, 287
Patchwise heterogeneous surface, 201
Photoelectrophoresis, 145
Physicochemical forces, 211
Polyelectrolytes, 89
Porous media, 49, 77, 275

Retained particles, 49

Sediment transport, 211
Size distribution, 65
Soil particle, 65

Solar energy conversion, 145
Speciation, 229
Submicron particles, 255
Surface area, 65
Surface chemical effects, 287
Surface reactivity, 1
Surface structure, 1
Surfactants, 133

Transport, 275

Water sensitivity, 237
